# Neoprene 90

## *TYPICAL PHYSICAL PROPERTIES*

| PHYSICAL PROPERTY          | UNITS            | VALUE            |
|----------------------------|------------------|------------------|
| ASTM-D-2000 Classification |                  | BC               |
| Chemical Definition        |                  | Poly-Chloroprene |
| Durometer                  | <i>(Shore A)</i> | 90 +/-5          |
| Tensile Strength           | <i>(psi)</i>     | 1000             |
| Elongation                 | <i>(% Min)</i>   | 150              |
| Low Temperature            | <i>°F</i>        | -20              |
| High Temperature           | <i>°F</i>        | 220              |
| Abrasion Resistance        |                  | Excellent        |
| Oil Resistance             |                  | Good             |
| Sunlight Aging             |                  | Good             |

The physical properties shown above are typical, but they should not be used to set Quality Control Specification minimum requirements. Please see the CTG Chemical Resistance Guide for general chemical resistance and affect.
